Feature Enhancements

Module: User Custom		
Issue #	Title	Release Note
378625	New user custom call to make radio button toggle boxes not clickable	A new user custom JavaScript method has been added. This is named evUserCustomReadOnlyFields and its function is to inhibit the clicking of radio buttons on forms when the logic calling the method dictates this should be so.
378288	New UserCustom exit that allows for the modification of the SAML SSO redirect URL	This allows the administrator to modify the SAML SSO URL to be redirected.

Fixed Bugs

Module: Add & Edit			
Issue #	Found in Release	Title	Release Note
377825	12.0.2.6	Error message "Request - URI Too Long" was seen when updating an issue with thousands of repeating rows	This was an unexpected error as repeating rows are not a recommended structure when expecting a large number of rows. In this case, related issues are the recommended structure to use. However, the problem has been resolved so that it will not recur.
